WHAT AM I LOOKING FOR ?

A MAC address can be referred to using different names, depending on the type of operating system the device is running.

Below is an easy reference for the major operating systems.

Operating System	MAC Address known as
-------------------------	-----------------------------

WINDOWS	Physical Address
----------------	------------------

ANDROID	WI FI MAC address
----------------	-------------------

MAC	Ethernet ID
------------	-------------

IOS	WI FI Address
------------	---------------

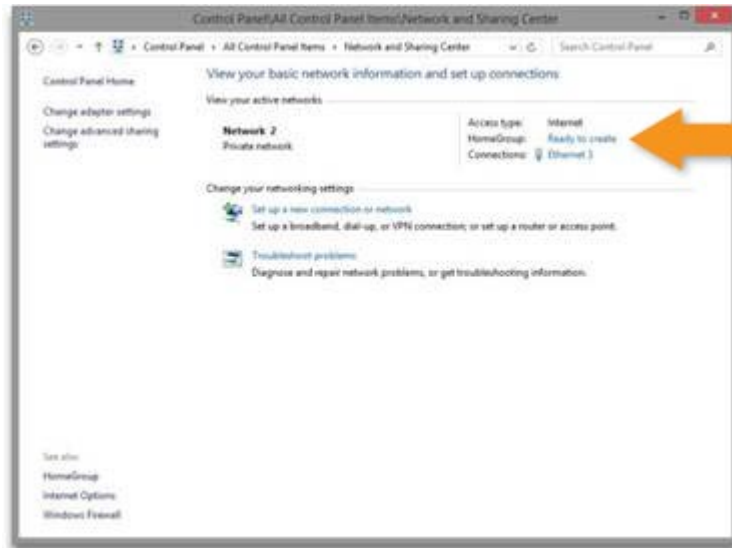

WINDOWS PHONE	MAC address
----------------------	-------------

METHOD 1:

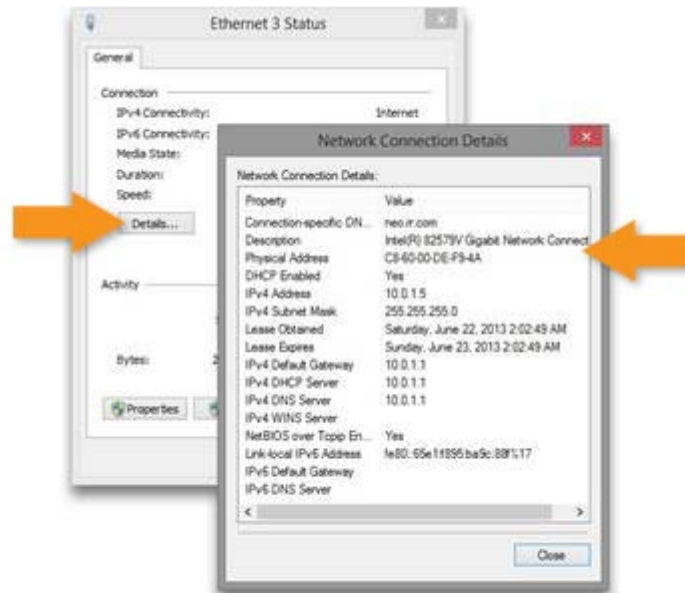

Windows Vista, 7 and 8

1. Windows left corner
2. Go to **Control Panel > Network and Internet > View Network Status and Tasks**

3. Go to Connections

4. Go to "Details" and the MAC address will be listed as **Physical Address**

METHOD 2:

Any Windows System

1. Click the **Run** button in the Windows **Start Menu**

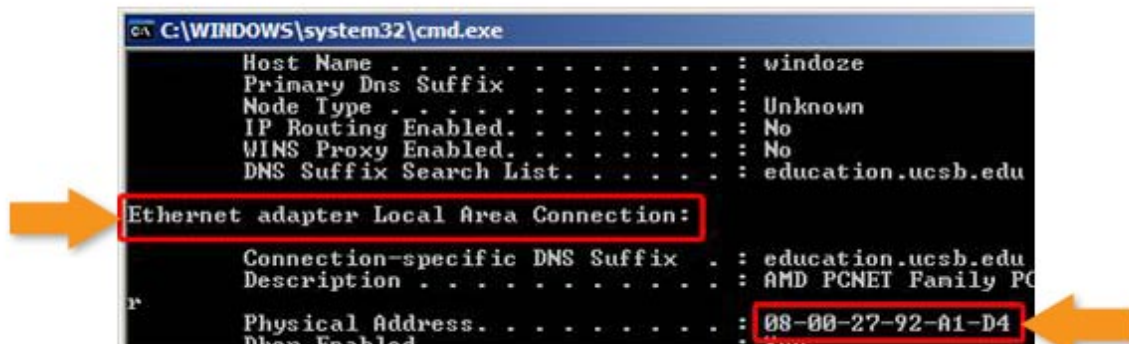

2. Type **cmd** in the **Open** prompt of the Run menu and click **OK** to launch a command prompt window

3. Type **ipconfig /all** at the command prompt to check the network card settings

4. The MAC address is listed under **Physical Address**

METHOD 3:

Windows

```
C:\WINDOWS\system32\cmd.exe
Host Name . . . . . : windoze
Primary Dns Suffix . . . . . :
Node Type . . . . . : Unknown
IP Routing Enabled. . . . . : No
WINS Proxy Enabled. . . . . : No
DNS Suffix Search List. . . . . : education.ucsb.edu

Ethernet adapter Local Area Connection:

Connection-specific DNS Suffix . : education.ucsb.edu
Description . . . . . : AMD PCNET Family PC
Physical Address. . . . . : 08-00-27-92-A1-D4
```

This method works in all known desktop versions of Windows.

1. Get a command Window.
 1. In Windows XP, click **Start** → **Run...**, type **cmd** in the box and hit Return.
 2. In Vista and Windows 7, click the Windows button (Start button), type **cmd** in the search box, and hit Return.
2. Type `ipconfig /all` into the command line and hit Return. *Note that there is a space before the slash, but no space after*
3. Look through the output for the section beginning with **Ethernet adapter Local Area Connection**. The **Physical Address**. This is your MAC address.

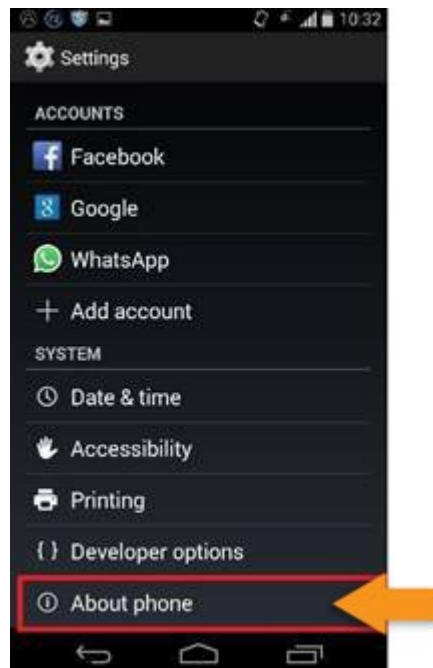

METHOD 4:

Android OS

1. Go to settings

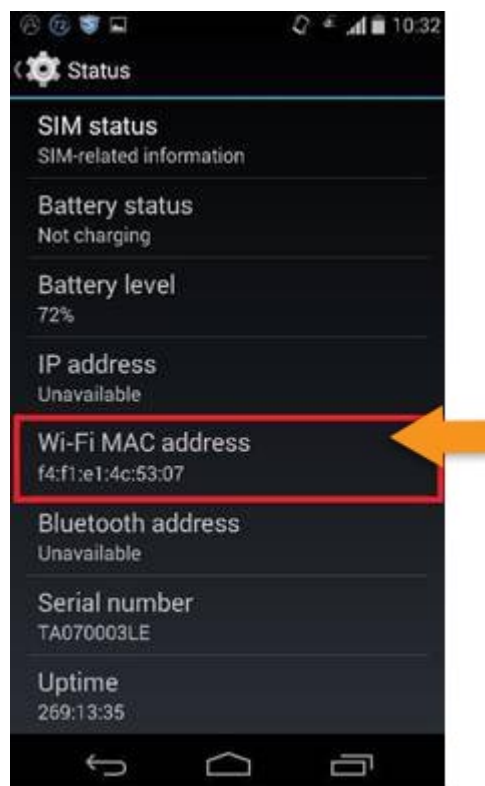

2. Scroll to About Phone

3. Go to status

4. scroll down to find Wi-Fi MAC address

METHOD 5:

Android Tablet

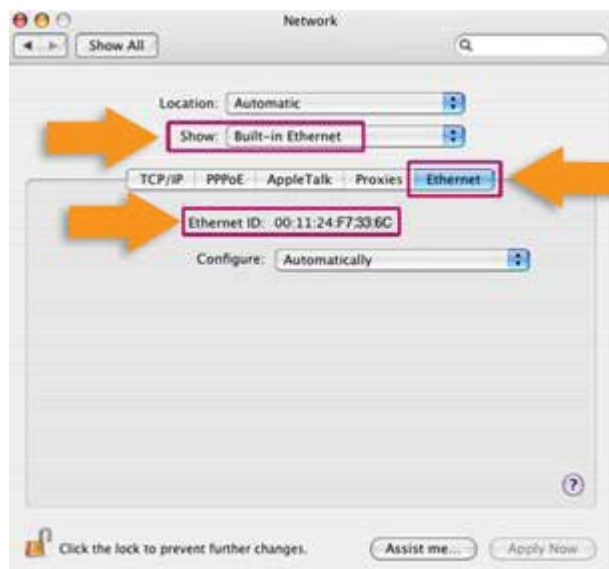

To locate the MAC Address of your Android phone or Android tablet, follow these steps:

1. On the Home screen, tap the **Menu** key and go to **Settings**
2. Scroll down and tap **About Tablet** then tap **Status** and then scroll down to view WiFi Mac address
